

HABIBI HUDA

AI DATA QUALITY ANALYST

habibihudasch@gmail.com | +62 85767085187 | Bogor, Jawa Barat, Indonesia

SUMMARY

AI Data Quality Analyst with 6+ months of experience working on English transcription projects for machine learning training. Possess C1-level English proficiency and strong attention to detail, with the ability to work independently in remote and flexible environments. Currently seeking opportunities in data annotation, transcription, or AI training projects.

PROFESSIONAL EXPERIENCE

AI Data Quality Analyst, CheminAI

February 2026 - Present

- Review transcriptions and annotations to detect errors and guideline deviations
- Provide precise, actionable feedback to annotators to improve data quality
- Verify outputs against client requirements prior to final delivery
- Maintain high-quality standards for AI training datasets
- Reviewed annotated audio data across multiple batches (-7+ hours total)
- Transitioned from Annotator to Quality Control role based on performance and reliability

AI Data Annotator, Alignerr

August 2026 - Present

- Annotated and reviewed English audio transcription data for AI model training
- Ensured high accuracy and consistency based on detailed annotation guidelines
- Maintained quality standards through self-review and revision cycles
- Adapted to project requirements and feedback during different project phases
- Contributed to multiple annotation batches over project duration (~4+ hours total audio processed)

SKILLS

Data Annotation. Audio Transcription. Quality Assurance/Review. Time Management. Attention to Detail.

EDUCATION

Computer Science Student

IPB University

- Study Programming Algorithm, Logical Thinking and Mathematics, Linear Algebra, and other CS courses.
